Project Title: The Life of Wonder Woman

This will be a multi-page website. I hope to have some form of navigation bar, right now I am thinking it will be vertical along the left side of the page. Theme will match the Wonder Woman colors/imagery. While there aren't many pictures on the Wikipedia Page, there should be plenty of imagery to use to create this site. I might change the order of these pages—unsure on which aspect of Wonder Woman I want to focus on.

- **Home Page:** This will feature a brief breakdown of who she is and what she has meant to the world.
- **Creation:** The history of how and why she was created.
- **Characterization:** How she behaves as a character. And different places she has been featured.
- **Portrayals:** This page will have multiple sections—one for each time she has been portrayed in a major film or television series.
- **Cultural Significance:** What she means to society and how she has had an impact.
- **Other characters/resources:** a list of other characters someone who enjoyed this website might want to look at. (Will contain links to their wikis) Also will have other Wonder Woman related articles/sites.
